

Kiasu Cat (\$KCAT) Litepaper

Version 1.3 — October 12, 2025

The Cat That HODLs Fiercest: Because in Solana, You Snooze, You Lose!

■ Meow-sion Statement

In the wild jungle of **Solana memes**—where rugs sprout like weeds and pumps fizzle faster than a catnip high—**\$KCAT** claws its way to the top. We're the **Kiasu Cat**: that sly, competitive feline from Singapore's streets (*kiasu* = "afraid to lose"). No fluff. No FA. Just pure meme energy for HODLers who queue first, grab extras, and never settle for second place. Launched on **Pump.fun** for fair-curve vibes, we're grinding toward **Raydium** with buys now and burns later—community claws sharpened. Join the pride, or watch from the sidelines.

■ Tokenomics: Simple, Savage, Supply-Squeezing

Metric	Details
Total Supply	1,000,000,000 \$KCAT
Launch	100% fair on Pump.fun — bonding curve to ≈ \$69k MCAP for Raydium migration
Taxes	0% buy / 0% sell — pure liquidity
Liquidity	Locked post-graduation (Raydium LP burn). Curve liquidity is organic
Deflationary Burns	Post-Raydium: 20–50% of daily buybacks sent to dead address (111111...). Goal: 10–20% of supply
Creator Share	~5–10% initial (transparent wallet TBD). No unlocks — dev HODLs with the pride
Distribution	100% to bonding curve (public buys). Post-grad: ~50% LP, remainder community initiatives

■ Dev Commitment & Ownership

The dev commits to holding **no more than 5%** of the token long-term. Upon Raydium graduation, any excess is **burned** to ensure true community control—no whales, just pride power.

■ Why Kiasu?

Every burn claws back supply, boosting value for holders. While SOL stakers wait for APY, Kiasu Cats hunt for **10× meme magic**.

■ Roadmap: From Kitten to King Cat

Phased like a cat's nine lives—flexible and fierce. No rigid dates; we advance as the pride grows.

1■■ Kitten Grind (Now) — Pump.fun launch → 50% curve → graduation. Daily ~0.05 SOL buys, gated X giveaways, grow to 100+ holders. *No pre-grad burns — focus on curve progress.*

2■■ Raydium Roar — First burn event + LP lock + 0.1 SOL burn. Dev >5% burn (disownment). DexScreener push. Weekly airdrops (0.01 SOL each).

3■■ Pride Expansion — 1K holders. Solana meme collabs. Merch / NFT concept. Spaces & AMAs. 5% cumulative burn target.

4■■ Moon Meow — Listings (Jupiter, etc.). Community DAO votes on burns & giveaways. Charity Claws: 1% fees to cat shelters (if tax added).

■ Flex Note: The roadmap adapts via community polls on X—phases evolve until we're moon-bound.

■■■ Community & Utility: Claws Out, Wallets In

- X Pride (@CatKiasu): Daily memes, trend replies, quote-RT contests. Grow from 32 OGs → 1K+ active cats.
- Reward System (6 SOL war chest): Weekly SOL airdrops (≥ 7 d holders). Gated giveaways for buys + holds (anti-dump). Daily curve fuel now → post-grad burns.
- Engagement Perks: 30+ day HODL = exclusives/shoutouts. Viral hooks: #SolanaMemes, liquidation jokes, Coin Bureau roasts.
- Utility Outlook: Speculation first, fun always. If future staking/NFT utilities arise, the pride votes first.

■■ Risks: The Litter Box Truth

- **Volatility:** Price can 10× or −90%. HODL at your own claw.
- **Rug Risk:** Anti-rug posture (transparent dev, locked LP) but Solana's wild. DYOR.
- **Regulatory Meows:** Crypto laws evolve fast — tax rules may bite.

Disclaimer: Not financial advice. Invest only what you can afford to lose. \$KCAT = fun first, gains second.

■ Final Claw: Join the Kiasu Pride

Because life's too short for second-place SOL. Queue up on Pump.fun, HODL fierce, and let's moon together. Follow @CatKiasu for updates — first 100 holders get a virtual fish ■
